PROGRAM DESCRIPTION

Building Trades Program will provide basic skill development in all phases of residential home building. The students' project consists of the completion of a private home during the school year. Activities include, but not limited to foundation, floors, walls, ceiling, roofing, interior and exterior trim, plumbing, dry walling, insulation, wiring, and painting. The student will have active participation in life skill classes, including employability skills, personal growth and leadership skills. In addition, communication skills, career exploration and assistance in making informed choices in reference to post-secondary career/education plans are a component of the course.
