

CAREER & TECHNICAL EDUCATION AREA

IVY TECH INFORMATION TECHNOLOGY

PROGRAM DESCRIPTION

The ITSP program teaches students the knowledge and skills needed to build and maintain computing systems and their technology. It is designed to prepare students for a professional career in the computer technology field. This program walks through tearing down and rebuilding computers. It also has students work with customer support software and takes them through project management. This program is loaded with hands-on labs and the ability to receive necessary certifications. Students will also learn the skills needed to work with and support a wide range of customers. They will learn how to diagnose computer related issues and walk customers through resolving those issues.

OCCUPATIONS UPON COMPLETION OF PROGRAM:

Graduates of the Information Technology Support program find employment as computer and information system managers, computer and information research scientists, computer systems analysts, informatics nurse specialists, information security analysts, software developers (applications or system software), computer network architects, and telecommunications engineering specialists.

OUR GRADUATES:

Our students are able to transfer to a four-year university or can enter the workforce right away. Our graduates are ready to be help desk technicians in almost any industry in any Information Technology Support environment.
